# History Project

Zoom Meeting 6PM today!

Greetings David Douglas,

It's time to kick off our efforts to tell our own story. We in Arkansas have contributed greatly to the history of computing. Please create an entry for your project large or small. Tell us about your computer project that changed your life, or the world.

Please start by clicking **this link** and create your suggestion of a project that we need to document. The more suggestions the better! Projects can be large or small, sometimes a small project is what set you or your company on a new course that changed an industry. It would be nice to post your suggestion before Jan 12, but it will be an ongoing process.

My Place in Arkansas Computing History

Second step, attend our Zoom meeting Jan 12 6:00pm -7:00pm. We will discuss the suggested topics and ideas on how to flush out the suggestions into full rich stories.
